A possible world is a complete and consistent way the world is or could have been. They are widely used as a mathematical tool in logic, philosophy, and linguistics in order to provide a semantics for intensional and modal logic. Their metaphysical status has been a subject of controversy in philosophy, with modal realists such as David Lewis arguing that they are literally existing alternate realities, and others such as Robert Stalnaker arguing that they are not. The term "new world order" has been used to refer to any new period of history evidencing a dramatic change in world political thought and balances of power in international relations. The peace conference has assembled. It will make the most momentous decisions in history, and upon these decisions will rest the stability of the new world order and the future peace of the world. Letter from association president M. C. Alexander in the journal *International Conciliation* (January 1919). World Peace Is Possible because we can't continue if all what's happening is getting attacked by terrorists and everything. If we don't do something the world is going to end or become nothing. People will be robbing and killing each other. Complete world peace is not possible because there will always be some type of evil out there. There will always be someone trying to take advantage of someone else that is weaker. This causes situations where people are not working towards world harmony and other nations have to step in and help out the weaker ones. Report Post. Like Reply. New "globalized" anti-systemic movements that represent and actually include most of the world population. Constructivism is also pluralistic in its approach to the problem of actors in the world politics, although its supporters call the state as the primary unit of analysis of the international relations, viewed not so much as an actor, but more as "agent" that emphasizes the dependence of its (government) action on the social and cultural context. Kaplan M. *System and Process in International Politics*. ECPR Press, 2005 March J. & Olsen J. (1984). "The New Institutionalism: Organisational Factor in Political Life". *American Political Science Review*, 78, 71-88. Starr H. *World politics. Menu for Choice*. San Francisco, 1981, p. 71. The world is presently in the midst of an epochal transition from unipolarity to multipolarity that is expected to characterize the foreseeable decades of the 21st century, if not its entirety. The world is presently in the midst of an epochal transition from unipolarity to multipolarity that is expected to characterize the foreseeable decades of the 21st century, if not its entirety. There are multiple dimensions to this paradigm-shifting process, which can leave observers completely overwhelmed when trying to make sense of it all, and most analysts tend to focus just on one or a couple factors while leaving out the rest of the bigger picture.
