1950s

1957

USSR launches Sputnik, first artificial earth satellite. In response, US forms the Advanced Research Projects Agency ([ARPA](#)), the following year, within the Department of Defense (DoD) to establish US lead in science and technology applicable to the military (:amk:)

1960s

1961

Leonard Kleinrock, MIT: "[Information Flow in Large Communication Nets](#)" (May 31)

- First paper on packet-switching (PS) theory

1962

J.C.R. Licklider & W. Clark, MIT: "[On-Line Man Computer Communication](#)" (August)

- *Galactic Network* concept encompassing distributed social interactions

1964

Paul Baran, RAND: "[On Distributed Communications Networks](#)"

- Packet-switching networks; no single outage point

1965

ARPA sponsors study on "cooperative network of time-sharing computers"

- TX-2 at MIT Lincoln Lab and AN/FSQ-32 at System Development Corporation (Santa Monica, CA) are directly linked (without packet switches) via a dedicated 1200bps phone line; Digital Equipment Corporation (DEC) computer at ARPA later added to form "The Experimental Network"

1966

Lawrence G. Roberts, MIT: "Towards a Cooperative Network of Time-Shared Computers" (October)

- First ARPANET plan

1967

ARPANET design discussions held by Larry Roberts at ARPA IPTO PI meeting in Ann Arbor, Michigan (April)

[ACM](#) Symposium on Operating Systems Principles in Gatlinburg, Tennessee (October)

- First design paper on ARPANET published by Larry Roberts: "Multiple Computer Networks and Intercomputer Communication"
- First meeting of the three independent packet network teams (RAND, NPL, ARPA)

National Physical Laboratory (NPL) in Middlesex, England develops NPL Data Network under Donald Watts Davies who coins the term packet. The NPL network, an experiment in packet-switching, used 768kbps lines

1968

PS-network presented to the Advanced Research Projects Agency (ARPA)

[Request for quotation](#) for ARPANET (29 Jul) sent out in August; responses received in September

University of California Los Angeles (UCLA) awarded Network Measurement Center contract in October

Network Working Group (NWG), headed by Steve Crocker, loosely organized to develop host level protocols for communication over the ARPANET. (:vgc:)

Tymnet built as part of Tymshare service (:vgc:)

1969

Bolt Beranek and Newman, Inc. (BBN) awarded Packet Switch contract to build Interface Message Processors (IMPs) in January

US Senator Edward Kennedy sends a congratulatory telegram to BBN for its million-dollar ARPA contract to build the "Interfaith" Message Processor, and thanking them for their ecumenical efforts

ARPANET commissioned by DoD for research into networking
Nodes are stood up as BBN builds each IMP [Honeywell DDP-516 mini computer with 12K of memory]; AT&T provides lines bundled to 50kbps
Node 1: UCLA (30 August, hooked up 2 September)

- *Function*: Network Measurement Center
- *System, OS*: SDS SIGMA 7, SEX
- [Diagram of the first host to IMP connection](#)

Node 2: Stanford Research Institute (SRI) (1 October)

- Network Information Center (NIC)
- SDS940/Genie
- Doug Engelbart's project on "Augmentation of Human Intellect"

Node 3: University of California Santa Barbara (UCSB) (1 November)

- Culler-Fried Interactive Mathematics
- IBM 360/75, OS/MVT

Node 4: University of Utah (December)

- Graphics
- DEC PDP-10, Tenex

[Diagram of the 4-node ARPAnet](#)

First Request for Comment (RFC): "[Host Software](#)" by Steve Crocker (7 April)

RFC 4: [Network Timetable](#)

First packets sent by Charley Kline at UCLA as he tried logging into SRI. The first attempt resulted in the system crashing as the letter G of LOGIN was entered. (October 29) [[Log entry](#)]

Univ of Michigan, Michigan State and Wayne State Univ establish X.25-based Merit network for students, faculty, alumni (:sw1:)

1970s

1970

First publication of the original ARPANET Host-Host protocol: C.S. Carr, S. Crocker, V.G. Cerf, "HOST-HOST Communication Protocol in the ARPA Network," in AFIPS Proceedings of SJCC (:vgc:)

First report on ARPANET at AFIPS: "Computer Network Development to Achieve Resource Sharing" (March)

ALOHAnet, the first packet radio network, developed by Norman Abramson, Univ of Hawaii, becomes operational (July) (:sk2:)

- connected to the ARPANET in 1972

ARPANET hosts start using Network Control Protocol (NCP), first host-to-host protocol

First cross-country link installed by AT&T between UCLA and BBN at 56kbps. This line is later replaced by another between BBN and RAND. A second line is added between MIT and Utah

1971

15 nodes (23 hosts): UCLA, SRI, UCSB, Univ of Utah, BBN, MIT, RAND, SDC, Harvard, Lincoln Lab, Stanford, UIU(C), CWRU, CMU, NASA/Ames
BBN starts building IMPs using the cheaper Honeywell 316. IMPs however are limited to 4 host connections, and so BBN develops a terminal IMP (TIP) that supports up to 64 terminals (September)
Ray Tomlinson of BBN invents email program to send messages across a distributed network. The original program was derived from two others: an intra-machine email program (SENDMSG) and an experimental file transfer program (CPYNET) (:amk:irh:)
Project Gutenberg is started by Michael Hart with the purpose of making copyright-free works, including books, electronically available. The first text is the US Declaration of Independence (:dhr,msh:)

1972

Ray Tomlinson (BBN) modifies email program for ARPANET where it becomes a quick hit. The @ sign was chosen from the punctuation keys on Tomlinson's Model 33 Teletype for its "at" meaning (March)

Larry Roberts writes first email management program (RD) to list, selectively read, file, forward, and respond to messages (July)

International Conference on Computer Communications (ICCC) at the Washington D.C. Hilton with demonstration of ARPANET between 40 machines and the Terminal Interface Processor (TIP) organized by Bob Kahn. (October)

First computer-to-computer chat takes place at UCLA, and is repeated during ICCC, as psychotic PARRY (at Stanford) discusses its problems with the Doctor (at BBN).

International Network Working Group (INWG) formed in October as a result of a meeting at ICCC identifying the need for a combined effort in advancing networking technologies. Vint Cerf appointed first Chair. By 1974, INWG became [IFIP WG 6.1](#) (:vgc:)

Louis Pouzin leads the French effort to build its own ARPANET - CYCLADES

RFC 318: [Telnet specification](#)

1973

First international connections to the ARPANET: University College of London (England) via [NORSAR](#) (Norway)

Bob Metcalfe's Harvard PhD Thesis outlines idea for Ethernet. The concept was tested on Xerox PARC's Alto computers, and the first Ethernet network called the Alto Aloha System (May) (:amk:)

Bob Kahn poses Internet problem, starts Internetting research program at ARPA. Vinton Cerf sketches gateway architecture in March on back of envelope in a San Francisco hotel lobby (:vgc:)

Cerf and Kahn present basic Internet ideas at INWG in September at Univ of Sussex, Brighton, UK (:vgc:)

RFC 454: File Transfer specification

Network Voice Protocol (NVP) specification (RFC 741) and implementation enabling conference calls over ARPANet. (:bb1:)
SRI (NIC) begins publishing ARPANET News in March; number of ARPANET users estimated at 2,000
ARPA study shows email composing 75% of all ARPANET traffic
Christmas Day Lockup - Harvard IMP hardware problem leads it to broadcast zero-length hops to any ARPANET destination, causing all other IMPs to send their traffic to Harvard (25 December)
RFC 527: [ARPAWOCKY](#)
RFC 602: [The Stockings Were Hung by the Chimney with Care](#)

1974

Vint Cerf and Bob Kahn publish "[A Protocol for Packet Network Interconnection](#)" which specified in detail the design of a Transmission Control Program (TCP). [IEEE Trans Comm] (:amk:)
BBN opens Telenet, the first public packet data service (a commercial version of ARPANET) (:sk2:)

1975

Operational management of Internet transferred to DCA (now [DISA](#))
First ARPANET mailing list, [MsgGroup](#), is created by Steve Walker. Einar Stefferud soon took over as moderator as the list was not automated at first. A science fiction list, SF-Lovers, was to become the most popular unofficial list in the early days
John Vittal develops MSG, the first all-inclusive email program providing replying, forwarding, and filing capabilities.
Satellite links cross two oceans (to Hawaii and UK) as the first TCP tests are run over them by Stanford, BBN, and UCL
"[Jargon File](#)", by Raphael Finkel at SAIL, first released (:esr:)
Shockwave Rider by John Brunner (:pds:)

1976

Elizabeth II, Queen of the United Kingdom sends out an email on 26 March from the Royal Signals and Radar Establishment (RSRE) in Malvern
UUCP (Unix-to-Unix CoPy) developed at AT&T Bell Labs and distributed with [UNIX](#) one year later.
Multiprocessing Pluribus IMPs are deployed

1977

THEORYNET created by Larry Landweber at Univ of Wisconsin providing electronic mail to over 100 researchers in computer science (using a locally developed email system over TELENET)
RFC 733: [Mail specification](#)
Tymshare spins out Tymnet under pressure from TELENET. Both go on to develop X.25 protocol standard for virtual circuit style packet switching (:vgc:)
First demonstration of ARPANET/SF Bay Packet Radio Net/Atlantic SATNET operation of Internet protocols with BBN-supplied gateways in July (:vgc:)

1978

TCP split into TCP and IP (March)

Possibly the first commercial [spam message](#) is sent on 1 May by a DEC marketer advertising an upcoming presentation of its new DECSYSTEM-20 computers

RFC 748: [TELNET RANDOMLY-LOSE Option](#)

1979

Meeting between Univ of Wisconsin, DARPA, [National Science Foundation](#) (NSF), and computer scientists from many universities to establish a Computer Science Department research computer network (organized by Larry Landweber).

USENET established using UUCP between Duke and UNC by Tom Truscott, Jim Ellis, and Steve Bellovin. All original groups were under NET.* hierarchy.

First MUD, MUD1, by Richard Bartle and Roy Trubshaw at U of Essex
ARPA establishes the Internet Configuration Control Board (ICCB)
Packet Radio Network (PRNET) experiment starts with DARPA funding.
Most communications take place between mobile vans. ARPANET connection via SRI.

On April 12, Kevin MacKenzie emails the MsgGroup a suggestion of adding some emotion back into the dry text medium of email, such as -) for indicating a sentence was tongue-in-cheek. Though flamed by many at the time, emoticons became widely used after Scott Fahlman suggested the use of :-)) and :-(in a CMU BBS on 19 September 1982

1980s

1980

ARPANET grinds to a complete halt on 27 October because of an accidentally-propagated status-message virus

First C/30-based IMP at BBN

1981

[BITNET](#), the "Because It's Time NETwork"

- Started as a cooperative network at the City University of New York, with the first connection to Yale (:feg:)
- Original acronym stood for 'There' instead of 'Time' in reference to the free NJE protocols provided with the IBM systems
- Provides electronic mail and listserv servers to distribute information, as well as file transfers

CSNET (Computer Science NETwork) built by a collaboration of computer scientists and Univ of Delaware, Purdue Univ, Univ of Wisconsin, RAND Corporation and BBN through seed money granted by NSF to provide networking services (especially email) to university scientists with no access to ARPANET. CSNET later becomes known as the Computer and Science Network. (:amk,lhl:)

C/30 IMPs predominate the network; first C/30 TIP at SAC

Minitel (Teletel) is deployed across France by France Telecom.

True Names by Vernor Vinge (:pds:)

RFC 801: [NCP/TCP Transition Plan](#)

1982

Norway leaves network to become an Internet connection via TCP/IP over SATNET; UCL does the same
DCA and ARPA establish the Transmission Control Protocol (TCP) and Internet Protocol (IP), as the protocol suite, commonly known as TCP/IP, for ARPANET. (:vgc:)

- This leads to one of the first definitions of an "internet" as a connected set of networks, specifically those using TCP/IP, and "Internet" as connected TCP/IP internets.
- DoD declares TCP/IP suite to be standard for DoD (:vgc:)

EUnet (European UNIX Network) is created by EUUG to provide email and USENET services. (:glg:)

- original connections between the Netherlands, Denmark, Sweden, and UK

Exterior Gateway Protocol (RFC 827) specification. EGP is used for gateways between networks.

1983

Name server developed at Univ of Wisconsin, no longer requiring users to know the exact path to other systems
Cutover from NCP to TCP/IP (1 January)
No more Honeywell or Pluribus IMPs; TIPs replaced by TACs (terminal access controller)
Stuttgart and Korea get connected
Movement Information Net (MINET) started early in the year in Europe, connected to Internet in Sept
CSNET / ARPANET gateway put in place
ARPANET split into ARPANET and MILNET; the latter became integrated with the Defense Data Network created the previous year. 68 of the 113 existing nodes went to MILNET
Desktop workstations come into being, many with Berkeley UNIX (4.2 BSD) which includes IP networking software (:mpc:)
Networking needs switch from having a single, large time sharing computer connected to the Internet at each site, to instead connecting entire local networks
[Internet Activities Board \(IAB\)](#) established, replacing ICCB
EARN (European Academic and Research Network) established. Very similar to the way BITNET works with a gateway funded by IBM-Europe
FidoNet developed by Tom Jennings

1984

[Domain Name System](#) (DNS) introduced
Number of hosts breaks 1,000
JUNET (Japan Unix Network) established using UUCP
[JANET](#) (Joint Academic Network) established in the UK using the Coloured Book protocols; previously SERCnet
Moderated newsgroups introduced on USENET (mod.*)
Neuromancer by William Gibson

Canada begins a one-year effort to network its universities. The NetNorth Network is connected to BITNET in Ithaca from Toronto (:kf1:)

[Kremvax](#) message announcing USSR connectivity to USENET

1985

Whole Earth 'Lectronic Link (WELL) started
Information Sciences Institute (ISI) at USC is given responsibility for DNS root management by DCA, and SRI for DNS NIC registrations
Symbolics.com is assigned on 15 March to become the first registered domain. Other firsts: cmu.edu, purdue.edu, rice.edu, berkeley.edu, ucla.edu, rutgers.edu, bbn.com (24 Apr); mit.edu (23 May); think.com (24 May); css.gov (June); mitre.org, .uk (July)

100 years to the day of the last spike being driven on the cross-Canada railroad, the last Canadian university is connected to NetNorth in a one year effort to have coast-to-coast connectivity. (:kf1:)

RFC 968: ['Twas the Night Before Start-up](#)

1986

NSFNET created (backbone speed of 56Kbps)

- NSF establishes 5 super-computing centers to provide high-computing power for all (JVNC@Princeton, PSC@Pittsburgh, SDSC@UCSD, NCSA@UIUC, Theory Center@Cornell).
- This allows an explosion of connections, especially from universities.

NSF-funded SDSCNET, JVNCNET, SURANET, and NYSERNET operational (:sw1:)

[Internet Engineering Task Force \(IETF\)](#) and Internet Research Task Force (IRTF) comes into existence under the IAB. First IETF meeting held in January at Linkabit in San Diego

The first Freenet (Cleveland) comes on-line 16 July under the auspices of the Society for Public Access Computing (SoPAC). Later Freenet program management assumed by the National Public Telecomputing Network ([NPTN](#)) in 1989 (:sk2,rab:)

Network News Transfer Protocol ([NNTP](#)) designed to enhance Usenet news performance over TCP/IP.

Mail Exchanger (MX) records developed by Craig Partridge allow non-IP network hosts to have domain addresses.

The first in a series of congestion collapses begin occurring in October. (:jtl:)

The great USENET name change; moderated newsgroups changed in 1987.

BARRNET (Bay Area Regional Research Network) established using high speed links. Operational in 1987.

New England gets cut off from the Net as AT&T suffers a fiber optics cable break between Newark/NJ and White Plains/NY. Yes, all seven New England ARPANET trunk lines were in the one severed cable.

Outage took place between 1:11 and 12:11 EST on 12 December

.fi is registered by members of the Finnish Unix User Group (FUUG) in Tampere (12 Dec)

1987

NSF signs a cooperative agreement to manage the NSFNET backbone with [Merit Network, Inc.](#) (IBM and MCI involvement was through an agreement with Merit). Merit, IBM, and MCI later founded ANS. UUNET is founded with Usenix funds to provide commercial UUCP and Usenet access. Originally an experiment by Rick Adams and Mike O'Dell First TCP/IP Interoperability Conference (March), name changed in 1988 to INTEROP

Email link established between Germany and China using CSNET protocols, with the first message from China sent on 20 September. (:wz1:)

The concept and plan for a national US research and education network is proposed by Gordon Bell et al in a report to the Office of Science and Technology, written in response to a congressional request by Al Gore. (Nov) It would take four years until the establishment of this network by Congress (:gb1:)

[1000th RFC](#): "Request For Comments reference guide"

Number of hosts breaks 10,000

Number of BITNET hosts breaks 1,000

1988

2 November - Internet worm burrows through the Net, affecting ~6,000 of the 60,000 hosts on the Internet (:ph1:)

[CERT](#) (Computer Emergency Response Team) formed by DARPA in response to the needs exhibited during the Morris worm incident. The worm is the only advisory issued this year.

DoD chooses to adopt OSI and sees use of TCP/IP as an interim. US Government OSI Profile (GOSIP) defines the set of protocols to be supported by Government purchased products (:gck:)

Los Nettos network created with no federal funding, instead supported by regional members (founding: Caltech, TIS, UCLA, USC, ISI).

NSFNET backbone upgraded to T1 (1.544Mbps)

CERFnet (California Education and Research Federation network) founded by Susan Estrada.

Internet Assigned Numbers Authority (IANA) established in December with Jon Postel as its Director. Postel was also the RFC Editor and US Domain registrar for many years.

Internet Relay Chat (IRC) developed by Jarkko Oikarinen (:zby:)

First Canadian regionals join NSFNET: ONet via Cornell, RISQ via Princeton, BCnet via Univ of Washington (:ec1:)

FidoNet gets connected to the Net, enabling the exchange of email and news (:tp1:)

The first multicast tunnel is established between Stanford and BBN in the Summer of 1988.

Countries connecting to NSFNET: Canada (CA), Denmark (DK), France (FR), Iceland (IS), Norway (NO), Sweden (SE)

1989

Number of hosts breaks 100,000

[RIPE](#) (Reseaux IP Europeens) formed (by European service providers) to ensure the necessary administrative and technical coordination to allow the operation of the pan-European IP Network. (:glg:)

First relays between a commercial electronic mail carrier and the Internet: MCI Mail through the Corporation for the National Research Initiative (CNRI), and CompuServe through Ohio State Univ (:jg1,ph1:) Corporation for Research and Education Networking ([CREN](#)) is formed by merging CSNET into BITNET (August)
AARNET - Australian Academic Research Network - set up by AVCC and CSIRO; introduced into service the following year (:gmc:)
First link between Australia and NSFNET via Hawaii on 23 June.
Australia had been limited to USENET access since the early 1980s
Cuckoo's Egg by Clifford Stoll tells the real-life tale of a German cracker group who infiltrated numerous US facilities
UCLA sponsors the Act One symposium to celebrate ARPANET's 20th anniversary and its decommissioning (August)
RFC 1121: [Act One - The Poems](#)
RFC 1097: [TELNET SUBLIMINAL-MESSAGE Option](#)
Countries connecting to NSFNET: Australia (AU), Germany (DE), Israel (IL), Italy (IT), Japan (JP), Mexico (MX), Netherlands (NL), New Zealand (NZ), Puerto Rico (PR), United Kingdom (UK)

1990s

1990

ARPANET ceases to exist
[Electronic Frontier Foundation \(EFF\)](#) is founded by Mitch Kapor
Archie released by Peter Deutsch, Alan Emtage, and Bill Heelan at McGill
Hytelnet released by Peter Scott (Univ of Saskatchewan)
The World comes on-line (world.std.com), becoming the first commercial provider of Internet dial-up access
ISO Development Environment (ISODE) developed to provide an approach for OSI migration for the DoD. ISODE software allows OSI application to operate over TCP/IP (:gck:)
CA*net formed by 10 regional networks as national Canadian backbone with direct connection to NSFNET (:ec1:)
The first remotely operated machine to be hooked up to the Internet, the Internet Toaster by John Romkey, (controlled via SNMP) makes its debut at Interop.
Czechoslovakia (.cs) connects to EARN/BitNet (11 Oct); .cs deleted in 1993
RFC 1149: [A Standard for the Transmission of IP Datagrams on Avian Carriers. Implementation](#) is completed 11 years later by the Bergen Linux Users Group (28 Apr 2001)
RFC 1178: [Choosing a Name for Your Computer](#)
Countries connecting to NSFNET: Argentina (AR), Austria (AT), Belgium (BE), Brazil (BR), Chile (CL), Greece (GR), India (IN), Ireland (IE), Korea (KR), Spain (ES), Switzerland (CH)

1991

First connection takes place between Brazil, by [Fapesp](#), and the Internet at 9600 baud.

Commercial Internet eXchange (CIX) Association, Inc. formed by General Atomics (CERFnet), Performance Systems International, Inc. (PSInet), and UUNET Technologies, Inc. (AlterNet), as NSF lifts restrictions on the commercial use of the Net (March) (:glg:)
Wide Area Information Servers (WAIS), invented by Brewster Kahle, released by Thinking Machines Corporation
Gopher released by Paul Lindner and Mark P. McCahill from the Univ of Minnesota
[World-Wide Web \(WWW\)](#) released by [CERN](#); Tim Berners-Lee developer (:pb1:). First Web server is nxoc01.cern.ch, launched in Nov 1990 and later renamed info.cern.ch.
PGP (Pretty Good Privacy) released by Philip Zimmerman (:ad1:)
US High Performance Computing Act (Gore 1) establishes the National Research and Education Network (NREN)
NSFNET backbone upgraded to T3 (44.736Mbps)
NSFNET traffic passes 1 trillion bytes/month and 10 billion packets/month
Defense Data Network NIC contract awarded by DISA to Government Systems Inc. who takes over from SRI in May
Start of JANET IP Service (JIPS) which signaled the changeover from Coloured Book software to TCP/IP within the UK academic network. IP was initially 'tunneled' within X.25. (:gst:)
RFC 1216: [Gigabit Network Economics and Paradigm Shifts](#)
RFC 1217: [Memo from the Consortium for Slow Commotion Research \(CSCR\)](#)
Countries connecting to NSFNET: Croatia (HR), Hong Kong (HK), Hungary (HU), Poland (PL), Portugal (PT), Singapore (SG), South Africa (ZA), Taiwan (TW), Tunisia (TN)

1992

Internet Society (ISOC) is chartered (January)
IAB reconstituted as the Internet Architecture Board and becomes part of the Internet Society
Number of hosts breaks 1,000,000
First MBONE audio multicast (March) and video multicast (November)
[RIPE](#) Network Coordination Center (NCC) created in April to provide address registration and coordination services to the European Internet community (:dk1:)
Veronica, a gopherspace search tool, is released by Univ of Nevada
[World Bank](#) comes on-line
The term "[surfing the Internet](#)" is coined by Jean Armour Polly (:jap:); Brendan Kehoe uses the term "net-surfing" as early as 6 June 1991 in a [USENET post](#) (:bt1:)
[Zen and the Art of the Internet](#) is published by Brendan Kehoe (:jap:)
Internet Hunt started by Rick Gates
RFC 1300: [Remembrances of Things Past](#)
RFC 1313: [Today's Programming for KRFC AM 1313 - Internet Talk Radio](#)
Countries connecting to NSFNET: Antarctica (AQ), Cameroon (CM), Cyprus (CY), Ecuador (EC), Estonia (EE), Kuwait (KW), Latvia (LV), Luxembourg (LU), Malaysia (MY), Slovenia (SI), Thailand (TH), Venezuela (VE)

1993

[InterNIC](#) created by NSF to provide specific Internet services: (:sc1:)

- directory and database services (AT&T)
- registration services (Network Solutions Inc.)
- information services (General Atomics/CERFnet)

US White House email comes on-line at whitehouse.gov; [web site](#) launches in 1994

- President Bill Clinton: president@whitehouse.gov
- Vice-President Al Gore: vice-president@whitehouse.gov

Worms of a new kind find their way around the Net - WWW Worms (W4), joined by Spiders, Wanderers, Crawlers, and Snakes ...

Internet Talk Radio begins broadcasting (:sk2:)

[United Nations](#) (UN) comes on-line (:vgc:)

US National Information Infrastructure Act

Businesses and media begin taking notice of the Internet

.sk (Slovakia) and .cz (Czech Republic) created after split of Czechoslovakia; .cs decommissioned

InterCon International KK (IIKK) provides Japan's first commercial Internet connection in September. TWICS, though an IIKK leased line, begins offering dial-up accounts the following month (:tb1:)

Mosaic takes the Internet by storm (22 Apr); WWW proliferates at a 341,634% annual growth rate of service traffic. Gopher's growth is 997%.

RFC 1437: [The Extension of MIME Content-Types to a New Medium](#)

RFC 1438: [IETF Statements of Boredom \(SOBs\)](#)

Countries connecting to NSFNET: Bulgaria (BG), Costa Rica (CR), Egypt (EG), Fiji (FJ), Ghana (GH), Guam (GU), Indonesia (ID), Kazakhstan (KZ), Kenya (KE), Liechtenstein (LI), Peru (PE), Romania (RO), Russian Federation (RU), Turkey (TR), Ukraine (UA), UAE (AE), US Virgin Islands (VI)

1994

ARPANET/Internet celebrates 25th anniversary

Communities begin to be wired up directly to the Internet (Lexington and Cambridge, Mass., USA)

US [Senate](#) and [House](#) provide information servers

Shopping malls arrive on the Internet

First cyberstation, RT-FM, broadcasts from Interop in Las Vegas

The National Institute for Standards and Technology (NIST) suggests that GOSIP should incorporate TCP/IP and drop the "OSI-only" requirement (:gck:)

Arizona law firm of [Canter & Siegel](#) "spams" the Internet with email advertising green card lottery services; Net citizens flame back

NSFNET traffic passes 10 trillion bytes/month

Yes, it's true - you can now order pizza from the Hut online

WWW edges out telnet to become 2nd most popular service on the Net (behind ftp-data) based on % of packets and bytes traffic distribution on NSFNET

Japanese Prime Minister on-line (<http://www.kantei.go.jp/>)

UK's HM Treasury on-line (<http://www.hm-treasury.gov.uk/>)

New Zealand's Info Tech Prime Minister on-line (<http://www.govt.nz/>)

First Virtual, the first cyberbank, open up for business

Radio stations start rockin' (rebroadcasting) round the clock on the Net:

WXYC at Univ of NC, KJHK at Univ of KS-Lawrence, KUGS at Western WA Univ

IPng recommended by IETF at its Toronto meeting (July) and approved by IESG in November. Later documented as RFC 1752

The first banner ads appear on hotwired.com in October. They were for Zima (a beverage) and AT&T

Trans-European Research and Education Network Association ([TERENA](#)) is formed by the merger of RARE and EARN, with representatives from 38 countries as well as [CERN](#) and ECMWF. TERENA's aim is to "promote and participate in the development of a high quality international information and telecommunications infrastructure for the benefit of research and education" (October)

After noticing that many network software vendors used domain.com in their documentation examples, Bill Woodcock and Jon Postel register the domain. Sure enough, after looking at the domain access logs, it was evident that many users were using the example domain in configuring their applications.

The first web-based machine translation system is developed by this Timeline's author, supporting 9 languages, and made available the following year to hundreds of thousands of users on OSIS and Intelink, both US government networks

RFC 1605: [SONET to Sonnet Translation](#)

RFC 1606: [A Historical Perspective On The Usage Of IP Version 9](#)

RFC 1607: [A VIEW FROM THE 21ST CENTURY](#)

Countries connecting to NSFNET: Algeria (DZ), Armenia (AM), Bermuda (BM), Burkina Faso (BF), China (CN), Colombia (CO), Jamaica (JM), Jordan (JO), Lebanon (LB), Lithuania (LT), Macao (MO), Morocco (MA), New Caledonia (NC), Nicaragua (NI), Niger (NE), Panama (PA), Philippines (PH), Senegal (SN), Sri Lanka (LK), Swaziland (SZ), Uruguay (UY), Uzbekistan (UZ)

Top 10 Domains by Host #: com, edu, uk, gov, de, ca, mil, au, org, net

1995

NSFNET reverts back to a research network. Main US backbone traffic now routed through interconnected network providers

The new NSFNET is born as NSF establishes the very high speed Backbone Network Service (vBNS) linking super-computing centers:

NCAR, NCSA, SDSC, CTC, PSC

Neda Rayaneh Institute (NRI), Iran's first commercial provider, comes online, connecting via satellite to Cadvision, a Canadian provider

(:rm1:)

Hong Kong police disconnect all but one of the colony's Internet providers for failure to obtain a license; thousands of users are left without service (:kf2:)

Sun launches JAVA on May 23

RealAudio, an audio streaming technology, lets the Net hear in near real-time

Radio HK, the first commercial 24 hr., Internet-only radio station starts broadcasting

WWW surpasses ftp-data in March as the service with greatest traffic on NSFNet based on packet count, and in April based on byte count

Traditional online dial-up systems ([CompuServe](#), [America Online](#), Prodigy) begin to provide Internet access

Chris Lamprecht (aka "Minor Threat") becomes the first person banned from accessing the Internet by a US District Court judge in Texas

Thousands in Minneapolis-St. Paul (USA) lose Net access after transients start a bonfire under a bridge at the Univ of MN causing fiber-optic cables to melt (30 July)

A number of Net related companies go public, with Netscape leading the pack with the 3rd largest ever NASDAQ IPO share value (9 August)

Registration of domain names is no longer free. Beginning 14

September, a \$50 annual fee has been imposed, which up until now was subsidized by NSF. NSF continues to pay for .edu registration, and on an interim basis for .gov

The Vatican comes on-line (<http://www.vatican.va/>)

The Canadian Government comes on-line (<http://canada.gc.ca/>)

The first official Internet wiretap was successful in helping the Secret Service and Drug Enforcement Agency (DEA) apprehend three individuals who were illegally manufacturing and selling cell phone cloning equipment and electronic devices

Operation Home Front connects, for the first time, soldiers in the field with their families back home via the Internet.

Richard White becomes the first person to be declared a munition, under the USA's arms export control laws, because of an RSA file security encryption program tattooed on his arm (:wired496:)

RFC 1882: [The 12-Days of Technology Before Christmas](#)

Country domains registered: Ethiopia (ET), Cote d'Ivoire (CI), Cook Islands (CK) Cayman Islands (KY), Anguilla (AI), Gibraltar (GI), Vatican (VA), Kiribati (KI), Kyrgyzstan (KG), Madagascar (MG), Mauritius (MU), Micronesia (FM), Monaco (MC), Mongolia (MN), Nepal (NP), Nigeria (NG), Western Samoa (WS), San Marino (SM), Tanzania (TZ), Tonga (TO), Uganda (UG), Vanuatu (VU)

Internet phones catch the attention of US telecommunication companies who ask the US Congress to ban the technology (which has been around for years)

Malaysian Prime Minister Mahathir Mohamad, PLO Leader Yasser Arafat, and Phillipine President Fidel Ramos meet for ten minutes in an online interactive chat session on 17 January.

The controversial US Communications Decency Act (CDA) becomes law in the US in order to prohibit distribution of indecent materials over the Net. A few months later a three-judge panel imposes an injunction against its enforcement. Supreme Court unanimously rules most of it unconstitutional in 1997.

9,272 organizations find themselves unlisted after the InterNIC drops their name service as a result of not having paid their domain name fee
Various ISPs suffer extended service outages, bringing into question whether they will be able to handle the growing number of users. AOL (19 hours), Netcom (13 hours), AT&T WorldNet (28 hours - email only)
Domain name tv.com sold to CNET for US\$15,000

New York's Public Access Networks Corp (PANIX) is shut down after repeated SYN attacks by a cracker using methods outlined in a hacker magazine ([2600](#))

MCI upgrades Internet backbone adding ~13,000 ports, bringing the effective speed from 155Mbps to 622Mbps.

The Internet Ad Hoc Committee announces plans to add 7 new generic Top Level Domains (gTLD): .firm, .store, .web, .arts, .rec, .info, .nom. The IAHC plan also calls for a competing group of domain registrars worldwide.

A malicious cancelbot is released on USENET wiping out more than 25,000 messages

The WWW browser war, fought primarily between Netscape and Microsoft, has rushed in a new age in software development, whereby new releases are made quarterly with the help of Internet users eager to test upcoming (beta) versions.

Internet2 project is kicked off by representatives from 34 universities on 1 Oct (:msb:)

RFC 1925: [The Twelve Networking Truths](#)

Restrictions on Internet use around the world:

- *China*: requires users and ISPs to register with the police
- *Germany*: cuts off access to some newsgroups carried on CompuServe
- *Saudi Arabia*: confines Internet access to universities and hospitals
- *Singapore*: requires political and religious content providers to register with the state
- *New Zealand*: classifies computer disks as "publications" that can be censored and seized
- *source: Human Rights Watch*

1999

Internet access becomes available to the Saudi Arabian (.sa) public in January

vBNS sets up an OC48 link between CalREN South and North using Juniper M40 routers

IBM becomes the first Corporate partner to be approved for Internet2 access

European Parliament proposes banning the caching of Web pages by ISPs

The Internet Fiesta kicks off in March across Europe, building on the success of La Fête de l'Internet held in 1998

US State Court rules that domain names are property that may be garnished

MCI/Worldcom, the vBNS provider for NSF, begins upgrading the US backbone to 2.5Gbps

A forged Web page made to look like a Bloomberg financial news story raised shares of a small technology company by 31% on 7 April.

ICANN announces the five testbed registrars for the competitive Shared Registry System on 21 April: AOL, CORE, France Telecom/Oléane, Melbourne IT, Register.com. 29 additional post-testbed registrars are also selected on 21 April, followed by 8 on 25 May, 15 on 6 July, and so on for a total of 98 by year's end. The testbed, originally scheduled to last until 24 June, is extended until 10 September, and then 30 November. The first registrar to come online is Register.com on 7 June SETI@Home launches on 17 May and within four weeks its distributed Internet clients provide more computing power than the most powerful supercomputer of its time (:par:)

First large-scale Cyberwar takes place simultaneously with the war in Serbia/Kosovo

Abilene, the Internet2 network, reaches across the Atlantic and connects to NORDUnet and SURFnet

The Web becomes the focal point of British politics as a list of MI6 agents is released on a UK Web site. Though forced to remove the list from the site, it was too late as the list had already been replicated across the Net. (15 May)

Activists Net-wide target the world's financial centers on 18 June, timed to coincide with the G8 Summit. Little actual impact is reported.

MCI/Worldcom launches vBNS+, a commercialized version of vBNS targeted at smaller educational and research institutions

DoD issues a memo requiring all US military systems to connect via NIPRNET, and not directly to the Internet by 15 Dec 1999 (22 Aug)

Somalia gets its first ISP - Olympic Computer (Sep)

ISOC approves the formation of the Internet Societal Task Force (ISTF).

Vint Cerf serves as first chair

Free computers are all the rage (as long as you sign a long term contract for Net service)

Country domains registered: Bangladesh (BD), Palestine (PS)

vBNS reaches 101 connections

US\$1M+ Domain Sales: business.com (7.5M on 30 Nov), Wine.com (2.9M), Autos.com (2.2M), WallStreet.com (1M in Apr)

RFC 2549: [IP over Avian Carriers with Quality of Service](#)

2000s

2000

The US timekeeper ([USNO](#)) and a few other time services around the world report the new year as 19100 on 1 Jan
A massive denial of service attack is launched against major web sites, including Yahoo, Amazon, and eBay in early February
Web size estimates by NEC-RI and Inktomi surpass 1 billion indexable pages
ICANN redelegates the .pn domain, returning it to the Pitcairn Island community (February)
Internet2 backbone network deploys IPv6 (16 May)
Various domain name hijackings took place in late May and early June, including internet.com, bali.com, and web.net
A testbed allowing the registration of domain names in Chinese, Japanese, and Korean begins operation on 9 November. This testbed, created by VeriSign without IETF authorization, only allows the second-level domain to be non-English, still forcing use of .com, .net, .org.
The Chinese government blocks internal registrations, stating that registrations in Chinese are its sovereignty right
ICANN selects new TLDs: .aero, .biz, .coop, .info, .museum, .name, .pro (16 Nov)
Mexico's connection to Internet2 becomes fully operational as the California research network (CalREN-2) is connected with Mexico's Corporación Universitaria para el Desarrollo de Internet (CUDI) network. Though connected in November, the link's inauguration by California's Governor and Mexico's President was not until March of 2001.
After months of legal proceedings, the French court rules Yahoo! must block French users from accessing hate memorabilia in its auction site (Nov). Given its inability to provide such a block on the Internet, Yahoo! removes those auctions entirely (Jan 2001). The case is eventually thrown out (Feb 2003).
The European Commission contracts with a consortium of 30 national research networks for the development of Géant, Europe's new gigabit

research network meant to enhance the current capability provided by TEN-155 (6 Nov)

Australian government endorses the transfer of authority for the .au domain to auDA (18 Dec). ICANN signs over control to auDA on 26 Oct 2001.

US\$1M+ Domain Sales: AsSeenOnTV.com (5.1M)

RFC 2795: [The Infinite Monkey Protocol Suite](#)

Hacks of the Year: RSA Security (Feb), Apache (May), Western Union (Sep), Microsoft (Oct)

Technologies of the Year: ASP, Napster

Emerging Technologies: Wireless devices, IPv6

Viruses of the Year: [Love Letter](#) (May)

Lawsuits of the Year: Napster, DeCSS

2001

The first live distributed musical -- *The Technophobe & The Madman* -- over Internet2 networks debuts on 20 Feb

VeriSign extends its multilingual domain testbed to encompass various European languages (26 Feb), and later the full Unicode character set (5 Apr) opening up most of the world's languages

Forwarding email in Australia becomes illegal with the passing of the Digital Agenda Act, as it is seen as a technical infringement of personal copyright (4 Mar)

Radio stations broadcasting over the Web go silent over actor royalty disputes (10 Apr)

High schools in five states (Michigan, Missouri, Oregon, Virginia, and Washington) become the first to gain Internet2 access

US Dept of Commerce issues a notice of intent on 6 April to turn over management for the .edu domain from VeriSign to [Educause](#). Award agreement is reached on 29 October. Community colleges will finally be able to register under .edu

Napster keeps finding itself embroiled in litigation and is eventually forced to suspend service; it comes back later in the year as a subscription service

European Council finalizes an international cybercrime treaty on 22 June and adopts it on 9 November. This is the first treaty addressing criminal offenses committed over the Internet.

.biz and .info are added to the root server on 27 June with registrations beginning in July. .biz domain go live on 7 Nov.

Afghanistan's Taliban bans Internet access country-wide, including from Government offices, in an attempt to control content (13 Jul)

Code Red worm and Sircam virus infiltrate thousands of web servers and email accounts, respectively, causing a spike in Internet bandwidth usage and security breaches (July)

A fire in a train tunnel running through Baltimore, Maryland seriously damages various fiber-optic cable bundles used by backbone providers, disrupting Internet traffic in the Mid-Atlantic states and creating a ripple effect across the US (18 Jul)

Brazil RNP2 is connected to Internet2's Abilene over 45Mbps line (21 Aug)

[GÉANT](#), the pan-European Gigabit Research and Education Network, becomes operational (23 Oct), replacing the TEN-155 network which was closed down (30 Nov)
.museum begins resolving (Nov)
First uncompressed real-time gigabit HDTV transmission across a wide-area IP network takes place on Internet2 (12 Nov).
Dutch SURFnet and Internet2's Abilene connect via gigabit ethernet (15 Nov)
.us domain operational responsibility assumed by NeuStar (20 Nov)
US\$1M+ Domain Sales: Insure.com (16.M in Dec)
RFC 3091: [Pi Digit Generation Protocol](#)
RFC 3092: [Etymology of "Foo"](#)
RFC 3093: [Firewall Enhancement Protocol \(FEP\)](#)
Viruses of the Year: Code Red (Jul), Nimda (Sep), SirCam (Jul), BadTrans (Apr, Nov)
Emerging Technologies: Grid Computing, P2P

2002

US ISP Association (USISPA) is created from the former CIX (11 Jan)
.name begins resolving (15 Jan)
.coop registrations begin (30 Jan)
Global Terabit Research Network (GTRN) is formed composed of two OC-48 2.4GB circuits connecting Internet2 Abilene, CANARIE CA*net3, and GÉANT (18 Feb)
.aero registrations begin 18 March and begins resolving 2 September
Federally recognized US Indian tribes become eligible to register under .gov (26 Apr)
Hundreds of Internet radio stations observe a *Day of Silence* in protest of proposed song royalty rate increases (1 May)
The highest wi-fi network in the northeast US is deployed by this Timeline's author. The solar-powered network bridges Mounts Washington and Wildcat in New Hampshire
Abilene (Internet2) backbone deploys native IPv6 (5 Aug)
The 69/8 IP range is allocated to ARIN in August after having been in the [bogon](#) list; users and servers assigned a 69/8 address find themselves blocked from many Internet sites
Internet2 now has 200 university, 60 corporate, and 40 affiliate members (2 Sep)
Having your own Blog becomes hip
Hundreds of Spain-based web sites take their content offline in protest of a new law that took effect on 12 Oct requiring all commercial Web sites to register with the government
A distributed denial of service (DDoS) attack struck the 13 DNS root servers knocking out all but 5 (21-23 Oct). Amidst national security concerns, VeriSign hastens a planned relocation of one of its two DNS root servers
A new US law creates a kids-safe "dot-kids" domain (kids.us) to be implemented in 2003 (3 Dec)
The FBI teams up with Terras Lycos to disseminate virtual wanted posts across the Web portal's properties (11 Dec)
RFC 3251: [Electricity over IP](#)

RFC 3252: [Binary Lexical Octet Ad-hoc Transport](#)

2003

Public Interest Registry (PIR) takes over as .org registry operator on 1 Jan. Transition is completed on 27 Jan. By giving up .org, VeriSign is able to retain control over .com domains

The first official Swiss online election takes place in Anières (7 Jan)

The registration for domain ogrish.com is deleted (11 Jan) by the German registrar Joker.com at the request of a German prosecutor claiming objectionable content; the site however is hosted in the United States and complies with US laws.

The SQL Slammer worm causes one of the largest and fastest spreading DDoS attacks ever. Taking roughly 10 minutes to spread worldwide, the worm took down 5 of the 13 DNS root servers along with tens of thousands of other servers, and impacted a multitude of systems ranging from (bank) ATM systems to air traffic control to emergency (911) systems (25 Jan). This is followed in August by the Sobig.F virus (19 Aug), the fastest spreading virus ever, and the Blaster (MSBlast) worm (11 Aug), another one of the most destructive worms ever

k.root-servers.net changes to using nsd vs. bind to increase diversity of software in the root name server system (19 Feb)

[.nl](#) registrations open up to anyone, including individuals and foreigners (29 Jan); [.se](#) also opens up its registration in April.

[.af](#) is [redelegated](#) on 8 Jan and becomes live once again on 12 Feb with UNDP technical assistance. First domains are moc.gov.af and undp.org.af (15 Feb)

[.pro](#) sunrise registration begins 23 Apr under [.cpa.pro](#), [.law.pro](#), [.med.pro](#)

Flash mobs, organized over the Net, start in New York and quickly form in cities worldwide

Taxes make headlines as: larger US Internet retailers begin collecting taxes on all purchases; some US states tax Internet bandwidth; and the EU requires all Internet companies to collect value added tax (VAT) on digital downloads starting 1 July

The French Ministry of Culture bans the use of the word "e-mail" by government ministries, and adopts the use of the more French sounding "courriel" (Jul)

KRNIC begins offering Hangeul.kr domains (19 Aug)

[.kids.us](#) sunrise registration begins 17 June and public registration on 9 Sep

The Recording Industry Association of America (RIAA) sues 261 individuals on 8 Sep for allegedly distributing copyright music files over peer-to-peer networks

VeriSign deploys a wildcard service (Site Finder) into the [.com](#) and [.net](#) TLDs causing much confusion as URLs with invalid domains are redirected to a VeriSign page (15 Sep). ICANN orders VeriSign to stop the service, which they comply with on 4 Oct

Last Abilene segment upgraded to 10Gbps (5 Nov)

National LambdaRail announced as a new US R&D networking infrastructure (16 Sep). The first connection takes place between

Pittsburgh Supercomputing Center (PSC) and Extensible Terascale Facility (ETF) in Chicago (18 Nov)

[Little GLORIAD](#) (Global Ring Network for Advanced Application Development) starts operations (22 Dec), consisting of a networked ring across the northern hemisphere with connections in Chicago, Amsterdam, Moscow, Novosibirsk, Zabajkal'sk, Manzhouli, Beijing, and Hong Kong. This is the first-ever fiber network connections across the Russia-China border

RFC 3514: [The Security Flag in the IPv4 Header](#) (The Evil Bit)

2004

For the first time, there are more instances of DNS root servers outside the US with the launch of an anycast instance of the RIPE NCC operated

[K-root server](#)

Abilene, the Internet2 backbone, upgrade from 2.5Gbps to 10Gbps is completed (4 Feb)

Network Solutions begins offering 100 year domain registration (24 Mar)

One of the .ly nameservers stops responding (7 Apr) causing the other nameserver to go offline (9 Apr), making the domain inaccessible.

Service is restored 13 Apr

ICANN authorizes new gTLDs: .asia, .cat, .jobs, .mobi, .tel, and .travel

VeriSign Naming and Directory Service (VNDS) begins updating all 13 .com/.net authoritative name servers in near real-time vs. twice each day (8 Sep)

Lycos Europe releases a screen saver to help fight spam by keeping spam servers busy with requests (1 Dec). The service is discontinued within a few days after backbone providers block access to the download site and the service causes some servers to crash.

Verizon begins blocking all email traffic from European ISPs on 22 Dec in an attempt to abate spam from the region into its US network

CERNET2, the first backbone IPv6 network in China, is launched by the China Education and Research Network (CERN) connecting 25 universities in 20 cities at speeds of 1-10Gbps (27 Dec)

US\$1M+ Domain Sales: CreditCards.com (2.75M)

Emerging Technologies: Social networking, Web mashups

RFC 3751: [Omniscience Protocol Requirements](#)

2005

.jobs, .mobi, and .travel begin accepting registrations

.se becomes the first ccTLD to implement DNSSEC

Estonia offers Internet voting nationally for local elections

Pakistan suffers a near complete Internet outage as a submarine cable becomes defective (Jun)

Two feuding providers (Cogent, Level 3) sever their peering connection resulting in many customers from one provider not being able to access resources on the other's network (Oct)

.eu (European Union) launches on 7 Dec

US\$1M+ Domain Sales: Fish.com (1.02M)

RFC 4041: [Requirements for Morality Sections in Routing Area Drafts](#)

RFC 4042: [UTF-9 and UTF-18 Efficient Transformation Formats of Unicode](#)

2006

.cat registrations begin for Catalan-related domains
Zimbabwe loses most of its Internet access after its satellite connectivity is cut by the provider for non-payment
ICANN lifts price controls on .biz, .info, and .org domain names, after the same was done for .net in 2005, raising fears of tiered pricing where popular domains would cost more
US Government prohibits private (anonymized) domain registrations for .us after 26 Jan
ICANN board votes against .xxx TLD (10 May)
The 6bone, an IPv6 testbed, is phased out after 10 years operation (6 Jun)
.ax (Åland Islands) ccTLD comes into service on 15 Aug
.cm registry implements wildcard domains redirecting all .com typos to its own page (Aug)
Internet2 connectivity begins switching from Abilene to its new network (Nov)
Internet connectivity to southeast Asia is severely limited after major fiber optic lines are severely damaged by an earthquake in Taiwan and subsequent underwater mudslides (Dec)
US\$1M+ Domain Sales: Sex.com (14M?), Diamond.com (7.5M), Vodka.com (3M), Cameras.com (1.5M)
Emerging Technologies: Cloud computing

2007

ICANN drops .um domain name (US minor outlying islands) for lack of use (Jan)
Estonia offers the first online national parliamentary elections on 26-28 Feb
ICANN terminates RegisterFly.com's registrar status on 16 Mar (effective 31 Mar)
Internet2 traffic in the Northeast US is disrupted on 1 May when a homeless man starts a fire under a Boston bridge causing a fiber break
Internet2's Abilene network is retired (Sep) as the last connections are switched over to the new Level 3 network
Internet2 completes US East to West coast span of its 100GB/s network on 13 Oct
.asia sunrise period begins in October
US\$1M+ Domain Sales: Porn.com (9.5M), Computer.com (2.1M), Seniros.com (1.8M), Tandberg.com (1.5M), Scores.com, Vista.com (1.25M), Chinese.com (1.12M), Guy.com (1M), Topix.com (1M)
RFC 4824: [The Transmission of IP Datagrams over the Semaphore Flag Signaling System \(SFSS\)](#)

2008

NASA successfully tests the first deep space communications network modeled on the Internet, using the Disruption-Tolerant Networking (DTN) software to transmit images to/from a science spacecraft ~20 million miles above Earth
Google's crawler reaches 1 trillion pages, although only a fraction are indexed by the search engine. For comparison, Google's original index had 26 million pages in 1998, and reached 1 billion in 2000

The Middle East, India, and other parts of Africa and Asia see a major degradation in Internet service, including outages, after several undersea cables carrying Internet traffic to the region are cut within 1 week (Jan-Feb)

IPv6 addresses are added for the first time to 6 of the root zone servers (4 Feb)

YouTube becomes unreachable for a couple of hours after Pakistan Telecom starts an unauthorized announcement of YouTube's subnet prefix (24 Feb)

US\$1M+ Domain Sales: Fund.com (9.9M), Clothes.com (4.9M), Shopping.de (2.8M), Kredit.de (1.17M), Cruises.co.uk (1.09M), Invest.com (1.01M)

RFC 5241: [Naming Rights in IETF Protocols](#)

RFC 5242: [A Generalized Unified Character Code: Western European and CJK Sections](#)

2009

DNSSEC becomes operational on .gov (28 Feb), .org (2 Jun), .us (15 Dec)

.tel registrations begin

US Department of Commerce relaxes control over ICANN, in favor of a multi-national oversight group

Domain tasting gets severely curtailed after ICANN raises the 2008-introduced fee for erroneously registered domains from \$0.20 to \$6.95; domain kiting however continues

Twitter is asked by the US Government to delay planned maintenance of its service on 15 June as a result of heavy use by Iranian users during unrest in that country

.se domains become unreachable for an hour on 12 Oct after an incorrectly configured software update modifies all registrations

ICANN opens up applications for internationalized domain names (16 Nov)

US\$1M+ Domain Sales: Insure.com (16M in Oct), Toys.com (5.1M in Feb), Candy.com (3M), Fly.com (1.76M)

RFC 5513: [IANA Considerations for Three Letter Acronyms](#)

RFC 5514: [IPv6 over Social Networks](#)

Hobbes' Abridged Internet Timeline. 1950s. 1957. This leads to one of the first definitions of an "internet" as a connected set of networks, specifically those using TCP/IP, and "Internet" as connected TCP/IP internets. DoD declares TCP/IP suite to be standard for DoD. EUnet (European UNIX Network) is created by EUUG to provide email and USENET services. (glg 10 1969: The RFC Series was originated as a way to share notes among researchers - Steve Crocker The notes were called "Requests for Comments" in an attempt to downplay their importance. Later, vendors would joke that they were "Requirements for Compliance", e.g., specifications. Many were in fact white papers, thoughts about what might be "and" what might in the end not be - blind alleys. 15 Also 1972: Robert Kahn demonstrated the fledgling ARPANET at ICCO The application that he demonstrated: Ray Tomlinson's electronic mail Original telnet (remote login) specification (RFC 318) John Postel. 16 Kahn's Ground Rules Each distinct network would have to stand on its own: No internal changes could be required to any such network to connect it to the Internet. Only RUB 220.84/month. Chapter 10 Timeline- The Internet. STUDY. Flashcards. Learn. Write. Spell. Test. The Internet is turned over to the public sector, mainly because there are so many civilians on it that it can no longer be used for national security purposes. 1998. Google is founded in a garage in California. 2006. Youtube purchased by Google. 2009. Protestors in Iran use Twitter to maintain contact with the outside world. Link do original: <http://www.zakon.org/robert/internet/timeline/> Descrição: An Internet timeline highlighting some of the key events and technologies that helped shape the Internet as we know it today.
