In Search of Black America is compilation of eclectic personalities and rare insights. Dent spent five years researching and travelling across the continent interviewing America's black middle-class. Filled with stories of real people and real places, this book examines the many ways in which blacks have carved out their own niche and emerged from the shadow of a racist history. Many African Americans live as far beyond and above Armstrong's collectibles as they can, and force the ideas inherent in those objects into a space beneath them. Solomon's parents were determined to raise a Negro "lady" with manners and class who would look and act nothing like the white expectation.
