Janice VanCleave's Magnets includes 20 simple and fun experiments that allow you to discover the answers to these and other fascinating questions about magnets, plus dozens of addition The perfect science fair idea books. Spectacular Science Projects Janice VanCleave's Magnets * How does a compass work? * What is a magnetic field? * How can you make a magnet with electricity? 20+ Science Fair Projects. 50 Chemistry Projects That Will Amaze Kids! 20 Science Projects for Preschoolers. 20 Science Experiments for Kids. Science for Kids: All Projects. Engineering for Kids.Â I loosely divided them into 4 mini experiments you can first watch in this video and then read about below. Easy Magnet Experiment #1: Follow that Force. Can you move something without even touching it? Magnetic force is very strong when magnets are placed in close proximity to each other. To see just how strong it is try this: Take two rectangular magnets and place them under the center point of the hanging donut magnet.Â Would you mind give me some hints? Or advice me the dimension of the rectangular magnet and donut magnet? Thank you!
